

## 1 Materials Commitment

Everstorm Outfitters holds itself to specific, measurable materials standards across every product category. All fleece products contain a minimum of 85% post-consumer recycled polyester, sourced from certified bottle-to-fiber processing facilities. Base layers use GOTS-certified organic cotton, ensuring responsible land and labor practices from farm through final stitch. Technical fabrics used in shells, pants, and packs carry bluesign approval, meaning they meet strict standards for resource efficiency, worker safety, and reduced environmental impact throughout manufacturing. As of January 2024, every weather shell in our lineup uses a PFC-free durable water repellent finish, eliminating per- and polyfluoroalkyl substances that persist in waterways and human tissue.

## 2 Packaging

Our packaging contains 100% recycled content and is itself fully recyclable through standard curbside programs. All printed materials, including packing slips and box interiors, use soy-based inks rather than petroleum-derived alternatives. We eliminated single-use poly bags from our fulfillment process entirely in 2022. Since 2020, we have reduced the total weight of packaging materials shipped per order by 40%, cutting both raw material use and transportation emissions in the process.

## 3 Gear Recycle Program

Everstorm customers may mail back any Everstorm-branded item regardless of condition, including torn, worn-out, or otherwise unusable gear, and receive a \$10 store credit per item returned. Returned items are first assessed for donation suitability. Wearable pieces go to nonprofit partners including trail crew organizations and outdoor youth programs. Items that cannot be worn are broken down into recycled fiber and reintroduced into our supply chain or passed to certified textile recyclers. There is no minimum or maximum wear threshold — if it carries an Everstorm label, we will take it back.

## 4 How to Participate

To request a prepaid recycling label, visit [everstorm.example/recycle](https://everstorm.example/recycle) and complete the short request form. Each prepaid label accommodates up to 5 items per shipment. Households are limited to one label per calendar month to ensure equitable access and manageable processing volume. Once your returned items are received and logged at our Bozeman fulfillment center, store credit is applied to your account within 5 business days. Credits do not expire and can be used on any purchase at [everstorm.example](https://everstorm.example).

## 5 Carbon Footprint

Everstorm offsets 110% of all shipping emissions — both outbound and return — through Gold Standard-verified carbon credits, meaning every package we ship results in a net carbon benefit rather than a neutral outcome. We are actively working toward a net-zero manufacturing target by 2030, with interim

milestones tracked and published annually. Our offset portfolio currently supports reforestation and clean cookstove projects in South America and East Africa.

## **6 Repair Before Replace**

Extending the life of existing gear is the most effective sustainability action a customer can take. All Everstorm flagship stores offer in-house repair services including seam re-stitching, zipper replacement, and buckle swaps at no or low cost. Spare buckles, cord-locks, and zipper pulls are available free of charge at any store location or can be ordered by mail at no cost through [everstorm.example/spareparts](https://everstorm.example/spareparts). We stock replacement hardware for every product currently in production and maintain archives for discontinued lines going back to 2015.

## **7 Annual Impact Report**

Everstorm publishes a full Annual Impact Report each April at [everstorm.example/impact](https://everstorm.example/impact). The 2024 report highlights include 1.2 million kilograms of recycled fiber incorporated into our product line, 48,000 individual items diverted from landfill through the Gear Recycle Program, and \$380,000 donated to trail maintenance and land stewardship organizations across the American West. The report includes third-party verified emissions data, supply chain audit summaries, and progress metrics against our 2030 commitments.

## **8 Certifications**

Everstorm has held B Corp certification since 2022 with a current score of 94.2, placing us in the top tier of certified outdoor brands. We are a founding member of the 1% For The Planet network and direct that contribution to land conservation and environmental education nonprofits. All of our manufacturing partners hold Fair Trade Certified status, ensuring fair wages, safe conditions, and community investment for every worker in our supply chain.
